<u>App Research Assignment</u>:

1. On your class portfolio website, create a new page called "App Research"
2. Go to iTunes.
3. Pick one of the App Categories in iTunes (example: Productivity, Games, Books, Travel, etc…)
4. Make a new page on your website under App Research. Use the App Category that you chose as the title for that page.
5. Locate at least one app in your chosen category to review. We will be doing one category each week so the order of the categories does not matter. You may not choose the same category twice for credit.
6. If you have an iOS device, download and test the app if possible. If you do not have an iOS device, use the app description, user reviews or 3rd party review sites to review the app. Where possible, try to choose apps to review that you have had the opportunity to use.
7. After you have had time to evaluate the app, write a review on your website. Include the following:
   - Date of the review
   - Name of the app reviewed
   - Why did you choose it?
   - Free or purchase? Cost? Was it worth it?
   - Advantages and disadvantages of the app?
   - Were you able to download and use it?
   - Would you use this app on a regular basis?
   - Would you recommend it to others?
   - Any recommendations you would make to the developer on how they could improve the app?
   - Any bugs you found?
