

Assignment : Mobile App Components

1. On your class portfolio website, create a new page called “Mobile Apps Components”
2. This new page will contain the following information:
 - Define what a "Component" is and explain how it relates to mobile apps development
 - List and explain the four types of Android application components
 - Describe the two main types of component files utilized by Objective-C
3. All information must be visible on your website. You may use information from other websites, but may not link to them.
4. You will be graded only on the information visible on your "Mobile Apps Components" page.
5. All information must be in your own words. Remember what you learned about Copyright laws. If you plagiarize information from other websites or sources you will receive a 0 – no excuses, no exceptions. If you use internet images, make sure you cite your sources.
